

Introducing the 'MINISTRA' loudspeaker

Following hard on the heels of the amazing Ekstra loudspeaker, we are happy to announce a bookshelf version, the Ministra.

Featuring the same ribbon tweeter and bass/midrange drive units as the Ekstra, the Ministra is an extremely compact iso-baric model.

Like the Ekstra, the drive units are mounted on a separate baffle attached to the main enclosure via a polyethylene membrane, ensuring very low colouration.

The Ministra is a boundary design, intended for discreet close-to-wall placement. The presentation is typically Neat; musically engaging, with a generous soundstage and tremendous agility. Bass is surprisingly well extended, displaying the same levels of control shown with other Neat iso-baric designs.

Dimensions: (HxWxD): 30x17x29cm

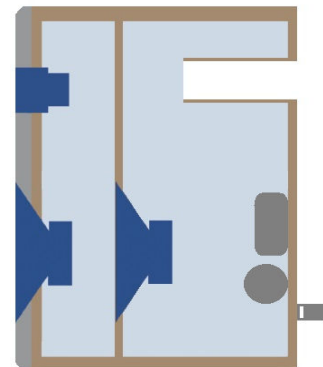

Impedance: 4 Ohms

Sensitivity: 86dB/1 Watt

Recommended amplifier power: 25 – 100 watts per channel

Standard Finishes:

Natural Oak; American Walnut; Black Oak; Satin White

The Ministra is the latest in a series of groundbreaking designs from Neat Acoustics in recent years, building on the strengths of earlier models and re-defining the art of the possible.
